About Inov SciTech

InovSciTech is a conference, meetings, seminars, and workshops organizer which is focused on Clinical, Medical, Life Sciences, Engineering, and Technology. We promote the latest research, developments, and issues in the scientific community. It provides a platform for leading academic scientists, researchers, and research scholars to exchange and share their experiences and research results.

InovSciTech aims to support research brilliance through networking platforms and its mission is to encourage global communication, and collaboration, promote professional interaction and lifelong learning; recognize outstanding contributions of individuals and organizations. We believe in Inclusiveness and affirmative actions.

Who We Are

InovSciTech is specialized in organizing scientific conferences, meetings, and workshops internationally, to encourage networking and knowledge sharing, building and strengthening, discussing and demonstrating the technology by scientists, dynamic professors, ardent academicians, intellectual scholars, leaders, and research fellows.

What We Do

InovSciTech is involved in vitalizing and refining the knowledge of Science, Engineering & Technology to analyze the past, investigate the present and formulate a new form of applied science in the future. We provide the best content, an excellent delegate experience, exceptional networking opportunities with equally passionate professionals, and a great association to be in touch with people personally.

Mission

InovSciTech aim to create an ideal platform by promoting research by connecting scientists and researchers within and across disciplines at conferences and workshops that create an environment for information exchange, and the generation of new ideas and technologies in Science and technology.

Welcome Message!

On behalf of the Organizing and Committee we take great pleasure in welcoming academic scientists, researchers, research scholars, students and experts in application fields to Paris, France for the Robotics and Artificial Intelligence conference to foster the progress in the field by contributing with your expertise to what promises to be a very comprehensive and exciting meeting, and to enjoy the immense unique artistic heritage and wonderful landscape of France.

10th International Conference on Robotics and Artificial Intelligence (ISTPRAI 2027), which will be held during March 24-25, 2027 in Paris, France is an international event, attracting global participant's intent on sharing, exchanging and exploring new avenues of Robotics and Artificial Intelligence and latest developments. The event will have 10-15 world level (Highly cited clauses) Plenary speakers, Keynote speakers, active an Invited speakers and fresh contributed speakers. In addition, variety of poster presentations along with workshops and special sessions would be interested in the audience.

About Conference:

The aim of the ISTPRAI 2027 is to promote quality research and real-world impact in an atmosphere of true international cooperation between scientists and engineers by bringing together again the world class researchers, International Communities and Industrial heads to discuss the latest developments and innovations in the fields of Robotics and Artificial Intelligence.

We sincerely hope that ISTPRAI 2027 serves as an international platform for meeting, researchers from around the world, widen professional contact and create new opportunities, including establishing new collaborations.

Don't miss to be a part of ISTPRAI – 2027...!

Best Regards

ISTPRAI- 2027

Organizing Committee

Scientific Sessions

Applications of AI in Banking, Finance and Risk Management

Computer Vision and Pattern Recognition

Haptics

Imaging and Image Processing

Micro and Nano-robotics

New Approaches in Automation and Robotics

Robot Localization and Map Building

Surgical Robotics

Artificial Intelligence for Business

Genetics Algorithms and Reinforcement Learning

Humanoid Robots: New Developments

Machine Vision for Robotics

Prosthetics and Exo-skeleton Systems

Robotics and Screw Theory

Tele-Robotics, Medical Robotics

Aerial and Underwater Robotics

Artificial Intelligence, Neuro control and Fuzzy control for Robotics

Design and Simulation of Robotic Systems

Human Machine Interface

Machine learning for Robotics

Natural Language Processing

Rapid Proto-typing and 3D Printing Technology

Robotics in Agriculture, Forestry, Construction, Hazardous Fields

AI in Pharma and Bio-medicine

Automation

Human Computer Interaction and Visualization

Intelligent Mechatronics and Robotics

Micro Electro Mechanical Systems (MEMS) and Micro robots

Remote and Telerobotics
